

Document Solutions for Legal

Trial Law Firm profits with MTS Software Solutions with fast, accurate, & secure information management

Summary

Specializing in personal injury law, wage and overtime law, and social security law, this southern trial law firm handles big and small cases with the combined legal and trial experience of 75 years. Six attorneys at three locations handle thousands of cases each year managing a staggering number of legal documents and case files. To remain competitive and continue to win cases, it is imperative that this firm has the document management workflow and intelligence required to meet court deadlines, compliance initiatives, and maintain the highest levels of security within the IT environment. MTS Software Solutions was able to positively implicate these identified needs, thus, improving the firm's competitive edge and overall profitability.

Challenges

- Reduce time required to complete records investigations.
- Assure evidence integrity and provide proof of regulatory compliance.
- Protect client records from interception or hacking when sending or storing the data.

Why Fortis with MTS Software Solutions?

- Instantly access case files, email correspondence and client billing while using a familiar interface.
- Securely upload and access client documents and business records in any location that has internet access.
- Retention scheduling helps corporate council timely and systematically dispose of client records to adhere to regulatory compliance.

Solutions provided by MTS Software Solutions

- Integration to case management system, calendaring system and auto-email notification relative to deadlines, motions and trial dates.

ROI

- Firm's partners are able to focus on increasing the client base

"We were constantly scrambling to meet court deadlines with our previous records management systems. Without a common file sharing system, communications between our offices were limited and case preparations were rushed. MTS Software Solutions provided the answer we needed to reduce our case management manual processes and expenses. Now [with a centralized case management system] we can represent twice the amount of clients with much greater success of equity and justice."

– Company spokesperson
