MTS Software Solutions Signs Agreement with Bluepoint Solutions to Provide Scanner Hardware

Moorestown, NJ –Dec. 21, 2011 – MTS Software Solutions announced today it has signed a referral agreement with Bluepoint Solutions, a provider of remote deposit capture, item processing and enterprise content management solutions for financial institutions. MTS provides scanner hardware that works seamlessly with Bluepoint’s software solutions including branch and teller capture, item/image processing, and enterprise content management.

Bluepoint’s customers now have access to multiple hardware options from MTS, as well as ongoing equipment services and support. MTS’ hardware is specifically designed to meet the scanning and printing needs within a credit union or community-banking environment, and the two companies work together directly to match the hardware with the software solutions offering convenience and savings to mutual customers.

“We are pleased to partner with MTS to give our customers access to proven hardware and MTS’ team of experts,” said Hal Tilbury, founder and CEO of Bluepoint. “MTS’ unique consultative approach to the delivery and service of its hardware aligns with Bluepoint’s ongoing commitment to providing our customers with the highest quality solutions available anywhere.”

“We are very excited in our partnership with Bluepoint and the opportunity to work with their customers and prospective customers to deliver the hardware components that not only work in conjunction with the Bluepoint solutions, but deliver the best results based on each customer’s individual needs, goals and objectives” explains Rob Stewart, Director of Business Development at MTS. “Bluepoint has a great name in the financial services industry and we are very pleased to be able provide added value to an already strong product offering.”

About Bluepoint Solutions

Vista, Calif.-based Bluepoint Solutions is a leading innovator in remote deposit capture (RDC), image-based item processing, enterprise content management and receipt management.
