

**For Immediate Release**

## ***MTS Software Solutions' National Team Exceeds 15,000 Scanners in 2011***

**Moorestown, NJ – Jan. 17, 2012** – MTS Software Solutions announced that through its National Team, more than 15,000 check scanners were sold to the financial marketplace in 2011. The check scanner hardware sold, serviced and supported by MTS is built to meet the scanning and printing needs of banks and credit unions. Offering multiple hardware options, MTS is a Master Distributor and Authorized Warranty and Service Provider to CTS North America, and is one of Canon U.S.A.'s largest dealers for their Image Filing Systems Division (IFS). Additionally, MTS is an authorized service provider for Panini, and also offers scanners from Digital Check, Epson, and Burroughs.

“It is very important for us to service and support everything we sell, that way we have a vested interest in the solutions that we provide to our clients, not just interested in a quick sale,” explains Rob Stewart, Director of Business Development at MTS. “Our scanner selection represents the best vendors in the business, and this, coupled with our understanding of business processes, enables us to deliver a scanner solution that meets our client’s business objectives within their financial goals,” states Stewart.

Stewart continues, “On many occasions, our clients are companies like us, that also service the financial industry with branch and teller capture solutions, item/image processing, and enterprise content management, but they do not offer a hardware component. Thus, their customers have to shop for hardware that will work with their software. We have a practical, consultative approach to the service and support of hardware, and our ability to streamline our products with their software solutions makes our agreements with these organizations very successful.”

Whether partnering with a software company to assist their customers, or directly providing a solution to a bank or credit union, the year 2011 proved to be a busy year for MTS’ National Team and the MTS team of experts that service and support the 15,000 scanners they sold. MTS projects 2012 to be even busier.

### **About MTS Software Solutions**

Founded in 1981, MTS provides hardware and software solutions that combine innovation with an intelligent business sense to bring about dramatic improvements in office process efficiencies to elevate the bottom line for our more than 7,000 Corporate and Banking customers. Through its operating sites in Moorestown, NJ and Pompano Beach, FL, MTS delivers a “Scanning Solution” that encompasses the sale, rollout, training, and ongoing service and support of the scanner hardware. MTS also sells and services document scanning equipment. Additionally, MTS provides software solutions for document imaging, document scanning services, and microfilm/microfiche conversion to digital services.
